**Frozen Drink Machine**

There is a \$20.00 cleaning charge that will apply to each unit that is not clean upon return.

**ELECTRICAL REQUIREMENTS:**

The Sno Cone Machines operate on a 110 volt, single phase, 60 cycle AC current. It is very important to be sure that your electrical supply matches this requirement.

**MIXING REQUIREMENTS:**

Main Events Party Rental only recommends using the mix we offer. Other mixes or home made mixes could cause severe damage to the machine. Any damage due to mis-use will be charged at full replacement cost.

• **Margarita**

One 1/2 Gallon of mix will make 3 gallons of drink.  
One or two liters of tequila.  
Balance to the line on tank with water.

• **Daquiri**

One 1/2 Gallon of mix will make 3 gallons of drink.  
One or two liters of rum.  
Balance to the line on tank with water.

**HOW TO OPERATE**

- Plug unit into a 110v outlet. Fill up to the line with mix. Do not overfill. Turn switches to the freeze & mix positions. It will take approximately 2 hours to freeze depending on mix content. If you are having a large party, have additional mix made up in the freezer to add as you use the contents of the machine. This will help keep up with the freeze time of the machine.

**OPERATING HINTS:**

Machine must be level.  
Do not use an extension cord with this machine.  
Do not use in direct sunlight or hot conditions. It will not freeze.  
Do not take machine apart to clean. Fill with warm water & mild soap for cleaning.  
Rinse thoroughly & dry after use.

**WARNING:**

This machine is very heavy! Use proper lifting & handling with this unit.
